

# AWESOME MP3

## BEST IPOD HI-FI DOCK

### ONKYO DS-A2

This clever bit of kit docks your iPod, charging it as it goes, and then its supplied phono cables connect to your hi-fi system. Consequently, you can play your iPod's tunes through your home set-up. You can buy a similar unit from Apple to do the same job, but spending more on this Onkyo brings greater sonic benefits. Better detail and dynamics are just two of the instant improvements. If you already own Onkyo electronics, buy this dock, and you can also use your Onkyo remote to control your docked iPod.
